Springfield, Illinois 62704

EPA Region 5 Records Ctr.

335331

Dear Mr. Thompson:

This letter is to notify Industrial Chemical of a clarification to Special Condition No. 6 of the September 30, 1987 approved closure.

Special Condition No. 6 should read as follows:

6. The sample location for the outside storage area shall be modified to a sampling grid comprised of 3 east-west lines spaced 7.5 feet apart. Each line shall include 3 sample locations spaced 7.5 feet apart. The grid shall be positioned such that the 4 corners of the grid coincide with the 4 corners of the storage area. Soil sampling depths shall be at 6"-12", 18"-24", and 30"-36". This sampling plan will therefore result in 9 sample locations and a total of 27 samples.

Please refer to this revised condition when conducting closure activities at the site.

Should you have any questions concerning this letter, please call Rob Watson at 217/782-6762.

Very truly yours,

Lawrence W. Eastep, P.E., Manager
